3	Then The user should see a warning message "You are not logged in"	FAILED	0.108 s
	java.lang.AssertionError: expected [Tree We can extend the concept of linked data structure (linked list, stack, queue) to a structure that may have multiple relations among its nodes. Such a structure is called a tree. A tree is a collection of nodes connected by directed (or undirected) edges. A tree is a nonlinear data structure, compared to arrays, linked lists, stacks and queues which are linear data structures. A tree can be empty with no nodes or a tree is a structure consisting of one node called the root and zero or one or more subtrees. A general tree is a tree where each node may have zero or more children (a binary tree is a specialized case of a general tree). General trees are used to model applications such as file systems. A binary tree is a tree where each node can have no more than two children is a good way to understand trees. A binary tree in which each node has exactly zero or two children is called a full binary tree. In a full tree, there are no nodes with exactly one child. A binary search tree (BST) is a tree, where the nodes are in an ordered sequence. In other words, a binary search tree can be "searched" efficiently using this ordering property. Topics Covered Overview of Trees Terminologies Types of Trees Tree Traversals Traversals-Illustration Binary Trees Types of Binary Trees Implementation in Python Binary Tree Traversals Implementation of Binary Trees Applications of Binary trees Binary Search Trees Implementation Of BST] but found [You are not logged in] at org.testng.Assert.fail(Assert.java:111) at org.testng.Assert.fail(Assert.java:132) at org.testng.Assert.assertEquals(Assert.java:150) at org.testng.Assert.assertEquals(Assert.java:666) at StepDefinitions.Homestep.the_user_should_see_a_warning_message(Homestep.java:70) at ?.The user should see a warning message "You are not logged in"(file:///C:/Users/Ashish/eclipse-workspace/DsAlgoCucumber/src/test/resources/features/Home.feature:12)
